

Big job to do? Husqvarna tillers handle heavy packed earth with ease. Ideal for demanding landowners.

## Advanced rear-tine tiller for heavy duty use.

Our DRT series of high-performance rear-tine tillers have the capacity to till deep, even in hard soils. They feature drive wheels with heavy tread tires for optimized grip, plus forward and reverse gear for easy operation. Equipped with powerful, reliable Honda or Briggs & Stratton engines, these machines target landowners who have large areas to till and demand first class results. The dual rotating tines provide

deep soil tilling on densely packed earth as well as older lawns. All models feature forward-rotating tines that allow the option of performing top soil cultivation in smaller gardens. The DRT900LS provides an extra wide 19" tilling width, while the DRT900E features an industry-first electric start.

TECHNICAL SPECIFICATIONS	DRT900LS	DRT900H	DRT900E	DRT900
Engine manufacturer	Honda	Honda	Briggs & Stratton	Briggs & Stratton
Engine type	GCV160	GCV160	900 Series OHV	900 Series OHV
Cylinder displacement, cc	160	160	205	205
Torque power* (ft.-lb.)	6.9	6.9	9.0	9.0
