

TNB-Hydraulic Breakers

Ver.2.2

TNB-Hydraulic Breakers Features

- Advanced accumulator free technology enables simple structure yet efficient.
- Simple design allows less parts and realizes low running cost.
- Adaptable for wide range of oil pressure and flow.

Breaker body

Cushion Chamber: It is an important impact source since TNB-breakers source **its Impact Energy 70% from Nitrogen Gas Pressure** of cushion chamber and the rest of **30% from the Operation Oil Circuit**.

Accumulator Free Breaker Structure allows easy and low cost maintenance.

Dust Preventing Valve takes cleaner air from upper area into the impact chamber and blows out the dusty air to bottom. This valve port is also used for **Underwater Application** to lead the high pressure air from a compressor.

Direct and Independent Grease Supply to **Chisel Bush** and **Chisel Holder Bush**. A chisel is the most consumed item and this system contributes well for the long life of chisel.

Durable Side Bolts: It has stress scattered structure and partially rubber coated for anti-vibration.

Short Oil Path: The oil path between control valve and cylinder is taken shortest as less as possible to avoid any secondary trouble.

Long Stroke Piston: It gives more powerful impact energy and brings a stable breaker operation.

Dual Oval Retainer Pins are robust and guarantees correct tool alignment and long life.

50/50 Piston to Tool Weight Ratio efficiently transfers blow energy into the material and reduces recoil.

Box Bracket system

New design for **the Bracket Adapter** with enforced rigidity using thicker material.

Durable **Guide Plate** with a collar of bolts to avoid bolts shearing.

Hard lock nuts are applied to prevent the nuts from slacking.

Prefabricated Base Plate for Auto-Grease adoption.

Hard Urethan Core to hold a distance between cylinder head and bracket adapter.

New Windows to check the marking for slack of side bolt nuts.

High and Low-Pressure Oil Port for driving a retrofit Auto-grease.

The Key to hold breaker body and the urethan sandwich system absorbs the vibration of breaker body.

All 15 Models line up

Mini range : 6 models

TNB-3MB

TNB-5M

Bracket type :

1 pc top mount type

2 pc top mount type

- Available for all models
- Heavy duty type
- Ideal for trenching

2 pc open box type

- Available for TNB-08M~TNB-7E
- Light weight type
- Easy maintenance

Box (silenced) type

- Available for TNB-1M~TNB-400
- Suitable for work in residential area

Side mount type

- Available for TNB-08M~TNB-310
- Easy handling

Backhoe loader type

Skid steer type

Tool selection :

Type	Purpose	Application	Shape
Moil point	Largely breaking	Reinforced concrete rock bed	
Flat	Wedge action	Trenching and slope finishing	
Flat end	Large stone into small	Boulders and concrete	

“Long type tools are available as option”
